

PHARMALINE QUALITY POLICY;

As Pharmaline, a manufacturer of in vitro diagnostic medical devices, we embrace quality, safety, and legal compliance as our core principles. In this regard, our company:

- *We establish, implement, and continuously improve our Quality Management System to ensure the safety and performance of our products and processes.*
- *We define our quality objectives in line with our quality policy and encourage the achievement of these objectives by ensuring the contribution of all our employees.*
- *We support a proactive approach by integrating risk-based thinking into all our activities.*
- *We prioritize continuous improvement and customer satisfaction in all our quality-related activities.*
- *We ensure that the clinical and analytical performance of our products is continuously evaluated and their technical documentation is kept up-to-date.*
- *We fully perform performance assessment, risk management, declaration of conformity, and post-sales surveillance activities to ensure the safe, effective, and intended use of our devices.*
- *We maintain records, technical documentation, and CE declarations of conformity for our products, making them accessible to competent authorities.*
- *We comply with fundamental requirements for hygiene, process control, and cleanroom conditions at every stage of production.*
- *We guarantee that our processes and end products meet quality requirements.*
